

Dry Serum

REJUVENATE PATCHES
NANO FIBRE DRY SERUM MASK

www.innovativebeautyproducts.com

A close-up, partial view of a woman's face on the left side of the image. She has dark hair pulled back, blue eyes, and a slight smile. The background is a light green gradient with faint chemical structures.

Welcome

Derma-Beauty DrySerum is a novel cosmetic material brought by Derma-Beauty to harvest the potential of active cosmetic ingredients.

The DrySerum technology is based on electrospun nanofibers, which enable the formation of cosmetic materials with concentrations reaching 100% of active ingredients in their content. The nanofibers which constitute DrySerum are in a solid state and dry, which makes the materials waterless.

Behind the New Product

Nanoencapsulation technology DrySerum is prepared from various active cosmetic ingredients.

The technology enables the seamless integration of water-soluble and oil-soluble active Cosmetic ingredients into a single material so that the potential of the most efficient cosmetic actives may be harvested to the fullest.

Dry Serum

**UP TO THE 20% LESS
WRINKLES IN 7 DAYS!**

**CONCENTRATED ACTIVE
INGREDIENTS ENCAPSULATED
IN A DRY NANOFIBER SHEET**

NO SYNTHETICS

NO PRESERVATIVES

100% NATURAL

Unique properties of *DrySerum*

**Super-concentrated formulations
with loading up to 100% of active molecules**

High flexibility in selecting active molecules

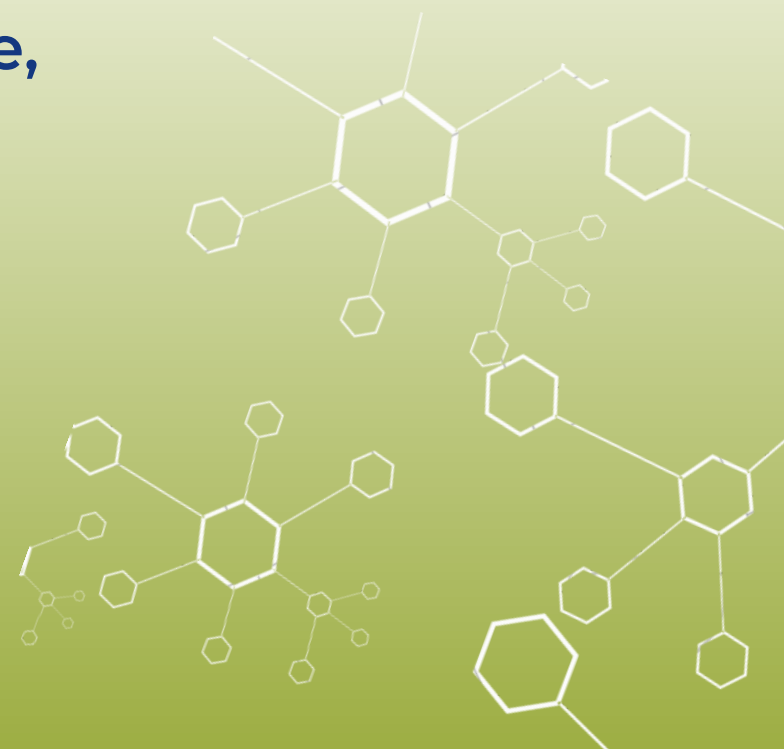

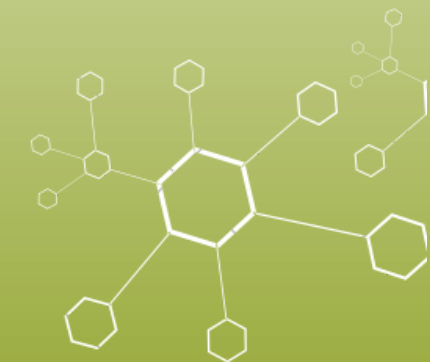

- from antioxidants and botanical extracts to liposomes.

Multifunctional cosmetic membranes

- each DrySerum membrane can accommodate multiple active molecules for complex treatment – combine, for instance, hydration, anti-wrinkle, antioxidant, anti-aging and anti-pollution in a single product.

Mild encapsulation is ideal

- especially for sensitive molecules such as proteins, enzymes, antioxidants and liposomes.

The formula of

Dry Serum

Pullulan creates a protective layer on the skin surface and brings about instant lifting

Orange blossom and pomegranate extract activates the production of your own collagen, improves the skin's protective barrier, and promotes immediate lifting.

Red maple extract slows skin aging due to strong antioxidant function and support of the synthesis of collagen and elastin.

Turmeric stem cell extract promotes the reduction of skin aging, actively hydrates, relaxes the skin and promotes stress reduction

Collagen peptides peptides from sea collagen hydrate the skin and promote wrinkle reduction.

Summer snowflake and paracress extract effectively reduces wrinkles due to the effect of relaxing smooth muscles of the skin, "natural Botox".

Wild pansy extract rejuvenates the skin due to better binding of hyaluronic acid and promotes long-term hydration.

Resurrection plant extract promotes skin moisturization and skin cell regeneration and leads to instant lifting.

Rosemary and apple geranium extract natural essential oils with aromatherapeutic and antioxidant function for skin protection.

The benefits

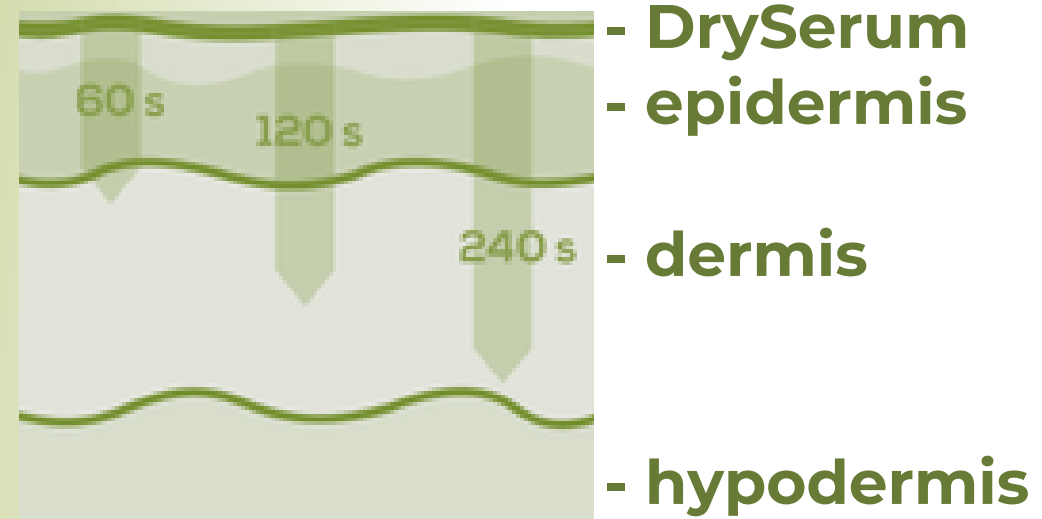

of

Dry Serum

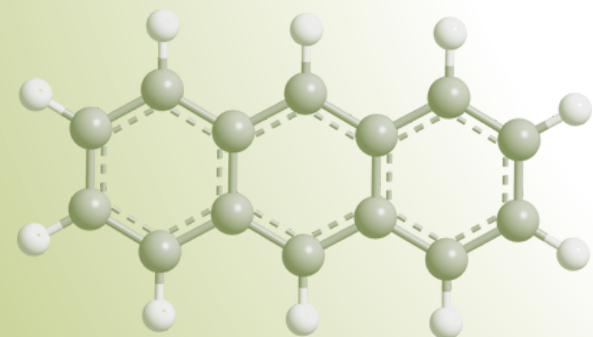

- for all skin types
- 100% natural
- clinically tested
- up to 20% fewer wrinkles in 7 days
- hydration thanks to high collagen content
- 24-hour protective shield thanks to pullulan
- orange blossom extract promotes the production of your own collagen
- 9–12 hours of skin nourishment overall skin rejuvenation thanks to stevia
- 100% quality ingredients penetrate deep into the skin at 100% of their volume

Fast penetration in seconds

New cosmetic technology

DrySerum is made from encapsulating nanofibers*.

*Nanofibre - 1 000 x more slender than human hair.

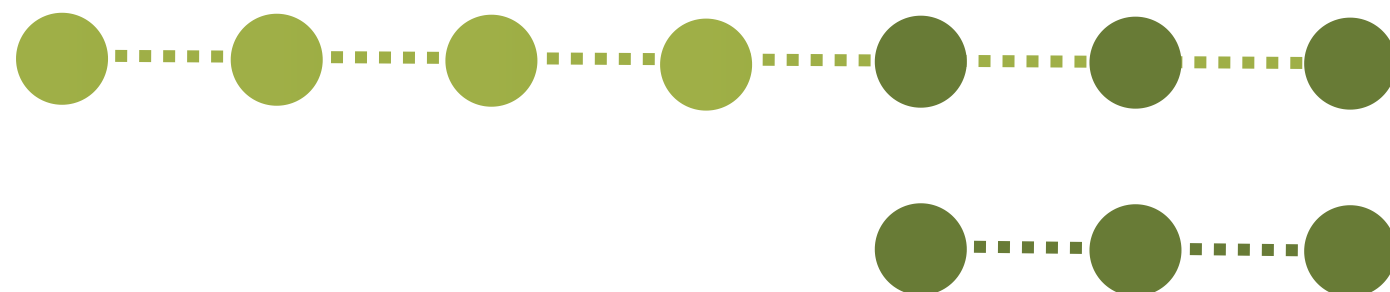

7 day program

Recommended usage to gain
20% wrinkle reduction effect:

any time

morning + evening

How to use Dry Serum?

1. Moisturise face - more water better than less water.
2. Dry hands before application.
3. The Derma Beauty patches have got three layers: substrate / Dry Serum / white lining paper.
4. Carefully separate the white lining paper.
5. Attention try not to touch the white layer dry serum to avoid breakages.
6. Apply the patches on the forehead and the two cheeks - on the moisturised skin.
7. After applying to the skin wait for 3 seconds for the Dry Serum to penetrate the skin.
8. Remove the remaining green substrate.
9. In the case of undissolved white spots of the application - with wet hands massage into the skin.
